CAREER OBJECTIVE

Motivated and enthusiastic **Integrated M.Sc. (IT)** student aspiring to build a career as a Full Stack Developer, with a strong foundation in Python, web development, database management, product development. Passionate about developing scalable, efficient, and user-friendly applications while applying hands-on project experience in real-world environments. A quick learner with strong problem-solving abilities, seeking an internship or entry-level opportunity to enhance technical expertise, contribute to innovative projects, and grow as a software professional.

EDUCATION

Integrated M.Sc. in Information Technology — JG University, Ahmedabad

Overall CGPA: 7.0 (Up to Semester 6) | Currently Pursuing Semester 7

TECHNICAL SKILLS

Programming Languages: Python, Java

Web Technology: HTML5, CSS3, JavaScript

Web Frameworks: Django, Flask

Databases: MySQL (schema design, CRUD operations), SQLite3

Testing Concepts: Manual Testing, Black Box Testing, White Box Testing

Tools & Platforms: Windows, Git, VS Code

Methodologies: Waterfall (Understanding of the Waterfall project management methodology)

PROJECTS

E-Commerce Honey Selling Website | Python · Flask · HTML · CSS · JS · SQLite3

- Developed a full-stack e-commerce web application for selling honey products.
- Built a responsive front-end using HTML, CSS, and JavaScript for smooth user experience.
- Implemented back-end with Python-Flask, handling routing, user sessions, and product logic.
- Used SQLite3 as the database for storing product listings, user data, and order records.
- Implemented core e-commerce features: product browsing, cart, and order placement.

Placement Management System | Python · Flask · PostgreSQL · Redis · Celery

- Developed a full-stack campus placement platform for student registration, job search, application tracking, company job posting, and admin approval workflows.
- Built backend APIs and business logic with Flask, SQL Alchemy, and PostgreSQL for secure role-based access and data management.
- Implemented student, company, and admin dashboards with Jinja2 templates, Bootstrap, and JavaScript for responsive UI and workflow automation.

- Added notifications, audit logging, report generation, and placement analytics to improve recruitment transparency and decision-making.

KEY STRENGTHS

- Quick learner — able to pick up new technologies independently with AI-assisted learning
- Strong understanding of full-stack development fundamentals
- Basic understanding of software testing and quality assurance principles
- Good verbal and written communication skills
- Ability to work on both front-end and back-end aspects of a project
